

# Metal Recycling

A **sector leader** in metal recycling, Recycling Lives has led the industry for more than 40 years.

Sustaining charity through metal and waste recycling

# Metal Recycling

With over 40 years experience, Recycling Lives provides an unrivalled service across the country.

## A proven track record

**As a market leader in metal recycling, Recycling Lives is able to invest in advanced mechanised processing plant and equipment.**

This means that greater quantities of valuable materials can be recycled, enabling Recycling Lives to offer competitive market prices for ferrous and non-ferrous scrap metal.

Recycling Lives offers businesses and organisations a growing list of geographical locations for delivery or collection of scrap metal, with specialist processing centres and facilities at key locations.

Recycling Lives pays market based competitive prices for surplus and scrap metals:

- Scrap **ferrous metals** including light iron, cast iron, rebar and No. 1&2 steel
- Scrap **non-ferrous** metals including nickel alloys, alloy wheels, aluminium, brass, bronze, aluminium cans, copper, lead, plate girders, motors, zinc and cable
- Batteries, including lead acid batteries, and UPS batteries
- Cars, vans and other motor vehicles, both end of life and abandoned

- Vehicle engines
- Catalytic converters
- Production metal waste, such as drosses, skimmings, cuttings, filings, turnings and swarf
- Scrap machinery and plant (logistics and dismantling services available including facilities for handling heavy and bulky items)
- Factory clearances

We provide a Duty of Care and Audit Trail

- All transactions are made under Duty of Care requirements
- All weighbridge transactions are recorded, manually and electronically
- All our vehicles are tracked by GPS

### Why choose us?

- Competitive rates for scrap metal
- Maximised metal recovery rates
- Flexible payment options
- Safe working practices
- High environmental standards
- Personal service, with dedicated key account managers
- Centralised recorded weighbridge system, where all transactions are filmed, backed-up and retained
- Integrated recycling and waste management solution under one roof
- Enhanced CSR agenda, enabling your business to make a positive environmental, social and economic impact with no effect on day-to-day operations
- Bespoke packages, tailored to suit clients' individual needs, including contra payment options and specific bin skip / collection needs

Your waste will be handled in accordance with European environmental standards. Our sites have permits for hazardous and non-hazardous waste, production scrap, end-of-life products and electronic scrap, and hold ISO 14001 and ISO 900001 awards
