

# On-site services

Professional site clearance and asset relocation for blue chip companies, SMEs and third sector organisations

Sustaining charity through metal and waste recycling

# Professional removals and clearance

For professional decommissioning and removals services at competitive prices, Recycling Lives is the right choice.

## First class professional removal service

**Recycling Lives On-site services specialise in business and industrial removals, decommissioning, deconstruction and clearance.**

We specialise in the deconstruction of major plant and industrial sites and can help you remove redundant equipment and relocate your premises with minimal disruption.

During clearances, all stock, equipment, machinery and furniture is itemised, bar-coded and professionally labelled before being loaded into our removals vehicles.

**The entire process is supervised carefully by our project management team, so your goods are in safe hands.**

Once all of your goods and equipment are removed, our clearance team can begin work to clean your premises and remove all remaining waste.

And, for your peace of mind, we can provide 24-hour monitored CCTV storage for your items, on both short- and long-term contracts

### Improving your CSR

By working with Recycling Lives On-site services, you can change the life of vulnerable and marginalised individuals. Our commercial activity helps to sustain the Recycling Lives charity, which offers accommodation, training, work experience and employment to people who have been homeless, or are at risk of becoming homeless.

Recycling Lives On-site services provide valuable work experience opportunities to participants in the charity's residential programme and gives you the chance to improve your CSR agenda by working with a clearance company that has social, ethical and environmental awareness at its heart.
